

NIGHT CURTAIN INSTALLATION INSTRUCTIONS

Instructions for installing a night curtain on a Zero Zone Reveal Merchandiser®.

Instructions

1. Locate night curtain mounting brackets on the ceiling inside the case. There will be three brackets to hold each night curtain (FIGURE 1).
2. Some night curtains pull down and lock into position like roller window blinds. Other night curtains use a magnet and attach to the metal kickplate. If the night curtain has a magnet, orientate the night curtain so the magnet can attach to the case (FIGURE 2). The magnet should face the inside of the display case after installation.

FIGURE 2: If Applicable, Orientate So Magnet Can Attach to Case

3. Take night curtain and tip forward into the mounting bracket. Twist night curtain until you hear a click as the brackets engage (FIGURE 3).

Note: Ensure the night curtain is fully engaged in all three of the brackets to prevent damage to any of the brackets.

4. Once installed, the night curtain can be pulled down (FIGURE 4).
